WORK EXPERIENCE

Front End Developer

11/2023 – Present

CJ Stones

Bedford, NY

- Develop functional code in HTML, CSS, JavaScript and React to improve usability for both users and staff
- Collaborating with stakeholders to determine pain points and design solutions.
- Maintained design system and expanded design library by 15%
- Improved Client-Side experience by developing a search engine to reduce time on task
- Redesigned and developed site to modernize the site aesthetics, improve SEO and prioritize user experience
- Developed and maintained search component on website that allows you to search the site for a specific photo and automatically updates itself whenever a new photo is added to the page.
- Solved visual bugs and maintained site using a no-code development platform.

EDUCATION

IBM Course

02/2024

Front End Development Professional Certificate

- Designed and developed a website for a health insurance company built to allow users to create an account, make appointments with doctors in the system, cancel appointments and review the doctors they had appointments with. It was built through a combination of technologies including HTML, CSS, JavaScript, Webpack, React, MongoDB and Bootstrap
